To All Allergy patients:

The medical staff at the Habif Health and Wellness Center (Student Health Services) is committed to providing you with the safest health care possible regarding your allergy injections, doses, and schedules. When allergy injections are missed it changes the dose schedule and can cause reactions. Sometimes a missed injection(s) results in a change in the strength of your allergy vials. Changing your dose constantly can compromise the safety of your allergy injections.

It is for this reason that the Habif Health and Wellness Center has the following policy that will be in effect while you are here at Washington University in St. Louis. Missing more than three of your scheduled allergy injections in one calendar year will cause you to be permanently referred to an outside allergist, and you will no longer be able to receive your allergy injections at the Wellness Center.

By signing this statement you are acknowledging that you understand the necessity of following your prescribing physician's allergy injection schedule, and our policy stated above. We will adhere to this policy.

Thank you for your cooperation in making sure you are receiving safe medical care.

Sincerely,

The Medical Staff of the Habif Health and Wellness Center
